MESSAGE FROM THE PRESIDENT

DR. ALEXANDER THOMAS

President, ANBAI

The Association of National Board Accredited Institutions was created 11 years ago, bringing together all hospitals that offer National Board of Examinations (NBE) courses on a national platform. The intent was to form a countrywide network to protect the interests of these hospitals, while simultaneously helping them to enhance the quality of Postgraduate Medical Education, so that specialized healthcare could be made available uniformly across the length and breadth of our nation.

As ANBAI steps into the second decade of its existence, it is heartening to note how much it has accomplished over the years in improving the quality of medical education. ANBAI works very closely with the NBE itself, and has established itself as a strong link between the regulator and stakeholders.

The introduction of the diploma seats under the NBE is a historic step, which will play an important role in the availability of specialists countrywide. ANBAI played a major role in the incorporation of communication and ethics into the medical undergraduate and postgraduate curriculum. Today, the top-notch quality of an NBE education and qualification is recognized world over, with DNB specialists attaining competitive places across the globe. ANBAI has also partnered with state governments in facilitating the starting of courses in district hospitals.

For students, ANBAI has helped achieve an increase in the number of postgraduate medical seats, providing vital academic assistance such as subject webinars and exam preparation resources, and solves student issues with the proactive help of the NBE. For teachers, ANBAI has achieved an increase in the number of NBE faculty, promoting the involvement of teachers as examiners and inspectors, and recognizes the services of senior teachers both at state and national levels.

Having served as the President of ANBAI since its inception, I am gratified to witness not just the achievements, but also the growth of this organization into what it is today – a vibrant, solid network with 12 regional chapters, each contributing in its own way towards medical education in our country. As we work towards strengthening the regional chapters, we also endeavor to strengthen the alumni wing so that it can become a force to reckon with. The National Secretary of ANBAI, Dr. Venkatesh, with his forward-thinking plans and strong commitment to implementation has played an important role in the organization's development.

I am confident that in the years to come, the NBE stream of postgraduate education will become even more sought after for its high-quality standards and affordability. Ultimately, it is the citizens of our country who will be the beneficiaries of the improved quality of medical education.

Dr. Alexander Thomas

President, ANBAI

MESSAGE FROM THE PRESIDENT ELECT

DR. S. RAJASEKARAN

President Elect, ANBAI

I have been associated with ANBAI right from its inception and I am proud to be one of the Founder members of this association. The institutions which participate in the National Board of Examinations (NBE) contribute considerably to the education and training of various specialties in medicine and slowly the National Board institutions were playing more and more role in the post graduate medical training in India. It was obvious that these institutions should have a common platform so that they can share their experiences and needs and also collaborate more with the National Board.

Medical science in India is very different from that of the West and the DNB institutions have tremendous role in the health care scenario. There is ample evidence that a significant amount of advanced medical and surgical treatment in India is in DNB institutions and in many regions of the country, more cutting edge, more complicated and more sophisticated surgeries are performed in DNB institutions. The DNB institutions also have many eminent physicians and surgeons who are respected internationally, who have tremendous experience in their respective fields and who also play a prominent leadership role in their respective professional bodies. Many innovations and introduction of latest cutting-edge techniques also happen in DNB institutions much ahead of the Government institutions. In recent times, DNB institutions have played a major role in research also, placing India in the world map of research. In view of this, the Founder Members of ANBAI felt that there should be a platform for all the institutions to not only represent their ideas and needs but also bring together their skills and positive energies so that they can learn from each other and also contribute accordingly to education and training. The idea was to augment the capabilities and contribution of the institutions, playing a supportive and collaborative role to NBE.

The initial journey, as expected, was challenging as there was the problem of getting acceptance and recognition from NBE and also wide membership of NBE institutions.

This was however slowly overcome and now we are very pleased that ANBAI and NBE work hand in hand for the same issues in the promotion of training. This in fact is not a problem because there is no difference in the aims and objectives of ANBAI and NBE.

In the beginning, the most important thing was also to conduct many face to face meetings and conclaves, so that representatives of DNB institutions can meet together. It was a challenge to conduct big meetings and it was our privilege to have the first few conclaves in Coimbatore and in Ganga Hospital. The deliberations in these meetings formed the foundation of the society and we feel proud and privileged about this. Ganga Hospital feels privileged to have made this significant contribution to ANBAI.

Where can ANBAI improve as an organisation:

In other educational sectors and other universities, educational institutions have a major role in the curriculum and education and also participate in the governance by being members of this senate and governing bodies. This is fundamentally required and is integral for the development and growth of any association. Unfortunately this is not the case with the National Board. We strongly feel that this should change and National Board should have two members of ANBAI in the Governing Council. This will improve the transparency, enthusiasm and positive participation of all the institutions.

There is also a lot of scope for improving the communications between the National Board and the institutions. Any change in rules or regulations or change of requirements must be prospectively communicated to the institutions in advance and not retrospectively. But these are all changing for the better and we are fortunate to have our President Dr Abhijet Seth who is not only easily accessible but also is very sympathetic to the rightful needs of the institutions.

How has Ganga Hospital benefitted from ANBAI

There is always scope for improvement and at both the individual and institution level, in any organisation. ANBAI has allowed us to connect and learn from the sister institutions of the National Board and learn their good practices. ANBAI has also been good for Ganga, as for all other institutions of ANBAI, in making our genuine concerns be represented to the National Board.

Dr. S. Rajasekaran

President Elect, ANBAI

MESSAGE FROM NATIONAL VICE PRESIDENT

DR. H. S. CHHABRA

National Vice President, ANBAI

ANBAI over the years

The National Board of Examinations (NBE) is an autonomous organization established to promote and improve post-graduate medical education. NBE conducts the prestigious Diplomate National Board (DNB) and Fellow National Board (FNB) Programmes. The Association for National Board Accredited Institutions (ANBAI) is an apex organization of leading hospitals and medical institutions in India that are accredited by the National Board of Examinations.

ANBAI was started in Bangalore in 2011 in response to the decision of NBE to take over admissions to medical courses in India. ANBAI was born with the aim of uniting accredited institutions in order to catalyse their energies toward developing better teaching programs, and to present a credible and united front to solve problems faced by the institutions conducting DNB and FNB courses.

The main focus of the association is to improve camaraderie and encourage partnership between its member institutions towards achieving excellence in post graduate medical education. The association also provides a forum for innovative ideas in post-graduate medical teaching and to raise the standards of Indian students to an international level.

NBE and ANBAI have been working closely on issues surrounding medical education in India over the past 10 years. When the Indian Government introduced the National Commission for Human Resources for Health (NCHRH) Bill, both NBE and ANBAI agreed that the bill, as presented, would be detrimental to the health sector, and decided to join forces to prevent it.

Today, ANBAI is a network connecting NBE teaching hospitals in India through 12 regional chapters across the country.

ANBAI has highlighted the crucial role that teachers play in shaping the future of the students, especially in a highly-specialized field such as medicine. A dedicated, trained faculty can certainly contribute to the quality of the students in the healthcare sector, thus improving the delivery and quality of care for all citizens. Unfortunately, there is an acute shortage of high-calibre medical teachers in the country. ANBAI has recommended to the Ministry of Health and Family Welfare that a teachers' accreditation committee be set up for the accreditation of teachers not only from MCI and NBE, but also those in the private sector. This will contribute to an increase in the number of teachers while maintaining their quality standards.

In the past, NBE has instituted national awards to honour the contributions made by eminent medical teachers/professionals and institutions/hospitals to further the cause of medical education quality and excellence in the country. This tradition is being continued by ANBAI with active involvement of National Board.

ANBAI and NBE have worked together on several projects successfully: increasing the number of examiners and inspectors from NBE hospitals; increasing accreditation validity from three years to five; and resolving problems between institutions and students through ANBAI. Exam result rates have improved without any compromise on quality. ANBAI and NBE made a strong and successful case for equivalence between the Post Graduate medical degrees provided by MCI-recognized institutions, and the Diplomate of National Board (DNB) by NBE. The Medical Council of India granted equivalence in 2012, subject to certain criteria.

NBE and ANBAI have initiated many projects for the betterment of DNB faculty and students. The NBE faculty have been trained in healthcare communication and quality in health, two crucial areas which do not have a place in the present medical curriculum. ANBAI is on the NBE-UNESCO Steering Committee on Teaching of Bioethics in PG Medical Education and on the Uniform Learning Resources Committee of the NBE. ANBAI has contributed to the effort to introduce NBE post-graduate programs into district hospitals and training the clinicians in Karnataka, WB, TN and other states and hand-held the faculty in training their PGS into delivering the curriculum in.

The ANBAI annual conferences provide opportunities for ANBAI members to interact with NBE officials and deepen their connections, sort out long outstanding issues etc. The partnership between NBE and ANBAI today is characterized by collaboration and strength in teamwork for the benefit of the health sector in our country.

ANBAI has been conducting online training programs and webinars for DNB/FNB students. With the Covid pandemic raging through the country and contact teaching not possible, ANBAI has increased the frequency of these webinars.

ANBAI started the project of Uniform Learning Resource (ULR) project to make available the medical journals at a fraction of the cost through combined negotiation of all ANBAI institutions with the leading publishers. This project is now being taken forward by NBE with help from ANBAI to ensure that as a start NBE PGs are benefitted. ANBAI is following up with Niti Ayog to ensure that the entire medical faculty in the country will also benefit from a similar project on a larger scale.

In order to help various medical students, who pursue their MBBS abroad, but are unable to clear the MCI screening exam, that is Foreign Medical Graduates Examination (FMGE), ANBAI, AHPI have now launched a 6-month clinical apprenticeship program in association with M.S. Ramaiah Institutions.

The ANBAI Governing Council decided on the formation of a DNB Alumni Advisory Committee, which represents the NBE qualified specialists all over India. It is important for us to harness such resources of talent as this will further our aim of strengthening the health sector education in our country. ANBAI DNB alumni wing works for the betterment of these alumni sorting out their problems with NBE or their parent institution with regard to proper faculty position or title. ANBAI also give them a platform to be recognized all over India through giving opportunity to conduct webinars and also attend the ANBAI annual conferences for networking and interact with higher management of leading medical institutions of the country conveniently at one place.

Other areas where ANBAI and NBE has jointly made things easier for the students and NBE institutions:

Hospitals had been requesting for an increase in DNB tuition fees. With the active intervention of ANBAI, these have been increased from Rs. 50,000/- per year earlier to the present Rs. 1, 00,000/- per year. ANBAI was able to achieve this, while still keeping the DNB postgraduate courses the cheapest in the country.

With constant feedback about poor examination results, ANBAI through discussions with NBE have been able to improve the exam result rates, by improving with standardized and objective assessments, without compromising the quality of the evaluation.

ANBAI engaging with MOHFW, NITI AYOJ and PMO has enabled increase in the number of DNB seats, both for postgraduate medical education, as well as, the MBBS seats in the country, which is a boon for most of the private teaching Institutions. It is also significant to note that NBE is starting diploma programs in smaller hospitals. This will go a long way to help fill up the vacancies of the tier 2 & 3 cities and rural areas.

Based on the feedback back received from Institutions, the PG thesis topic and research format approval can now be done by the individual hospital Ethics Committee itself. These Institutions no longer have to wait for third party approval.

Most of the exam centers invariably were at Medical colleges. ANBAI's repeated pleas with the NBE and member hospitals, has resulted in acceptance of NBE accredited Institutes to be considered as examination centres. Teaching faculty from these Institutes are also now actively considered to be examiners.

ANBAI has been at the forefront of a game changing exercise – the abolishment of several exams for students to pursue their postgraduate career. Part of the efforts of the ANBAI has paid off in NMC announcing just one single exit exam to facilitate easier entry into postgraduate courses.

Basic Sciences teaching was earlier mandated to be done by faculty from medical colleges. ANBAI has again helped change this impractical rule. Basic Sciences teaching can be now done by the Physicians and Surgeons in the same teaching Institute itself. This is a paradigm shift in the way Basic Sciences teaching can be done.

Hence, if we trace the journey of ANBAI it is apparent that the organisation has been able to deliver with regard to the objectives with which it was framed. Ofcourse, there is always a potential to achieve more. As the organisation has continuously evolved and matured, it should be able to live up to the expectations of its constituency. Though a lot has been, a lot more has to be done.

Dr. H. S. Chhabra

National Vice President

MESSAGE FROM NATIONAL SECRETARY

DR. VENKATESH KRISHNAMOORTHY

National Secretary, ANBAI

ANBAI is a remarkable Organization that represents all the NBE Accredited Institutions in the country. Its pan India presence has been made possible by the involvement of clinicians of international repute.

In addition to their regular clinical work, they have toiled several days and weeks to build the Organization to where it is today. Each one of them is highly respected both nationally and internationally in their own fields and are held in high esteem. Several of the Institutions that they have built are recognized for displaying some of the highest levels of clinical work and training across the world.

It is a matter of pride that these private hospitals quietly shoulder the responsibility of postgraduate medical training for over 85 percent of the seats in the NBE stream of training.

This reminds me of a verse from English poet Thomas Gray's 'Elegy'.

//

Full many a gem of purest ray serene
The dark unfathomed caves of ocean bear:
Full many a flower is born to blush unseen
and waste its sweetness on the desert air.

//

In this context, 'Elegy' is actually a metaphor for common folk who do heroic things that are never reported in the news or recorded in history. Like a precious stone lying unmined at the bottom of the ocean, or a beautiful flower blooming in a deep neck of the woods, their work may not be seen or known, but it is nevertheless heroic in every sense of the word.

The NBE Accredited Institutions are these gems, and the lay public is unaware of the monumental work these institutions are undertaking, to help the government bridge the vast gap in the doctor-patient ratio across India.

It is but natural that in the middle of all their work, the Organization needs periodic calibration and alignment, especially when it has grown immensely over the decade. It was in fulfilment of this requirement that over the last two years, ANBAI has gone into introspection and self-correct mode. It is now a lean and mean Organization that is going from strength to strength.

Every single improvement and progress has been due to unanimity in the support and agreement at all times. ANBAI can only go to greater heights from here, and will be a beacon to similar Organizations across the subcontinent and elsewhere in the world too, where such training programs are conducted by their governments. The sky is the limit for ANBAI now and I wish them all the very best.

CALICUT

Bangalore Baptist Hospital

Hebbal, Bengaluru - 560024

Bangalore Baptist Hospital (BBH) boast of a long history (since 1993) of being accredited by the National Board of Examinations (NBE) to conduct the Diplomate of National Board (DNB) Fellowship of National Board (FNB) and Doctorate of National Board (DrNB) training programmes in a wide range of specialties.

The primary objective of BBH is to improve the quality of medical education by establishing standards and elevating the level of post graduate examinations in modern medicine across India.

Currently BBH has 108 DNB doctors, 2 FNB doctors and 6 DrNB Super Speciality doctors pursuing the courses. In total, BBH has trained more than 400 Post graduates in various specialties.

BBH is a proud recipient of the Excellence in Teaching Award from National Board of Examinations

<p style="text-align: center;">DNB Broad Specialty (post MBBS & post Diploma)</p>	<ul style="list-style-type: none"> - Anaesthesiology - Emergency Medicine - Family Medicine - General Medicine - General Surgery - Obstetrics & Gynaecology - Orthopaedics Surgery - Otorhinolaryngology - Paediatrics - Radio Diagnosis
<p style="text-align: center;">Fellowship (post MS/MD/DNB)</p>	<ul style="list-style-type: none"> - Reproductive Medicine - Maternal & Foetal Medicine
<p style="text-align: center;">DrNB Super Speciality (post MD/DNB)</p>	<ul style="list-style-type: none"> - Critical Care Medicine

At Bangalore Baptist Hospital, we not only impart quality training but also teach and practice ethical medicine.
