MESSAGE

I am glad to learn that the NBE-ANBAI Teacher's Day Awards Ceremony is being organized under the auspices of the Association of National Board Accredited Institutions (ANBAI) to recognize the eminent contributions towards excellence in medical education. Congratulations to all the winners who are being honoured for their outstanding services to further the cause of medical education quality in the country.

A vibrant healthcare system is dependent on the quality of medical education infrastructure. The medical educators and institutions have a pivotal role in realizing the ambitious goal of ensuring affordable and quality healthcare to all as envisioned by the National Health Policy 2017.

A Healthy India is being created through our initiatives including Ayushman Bharat, Mission Indradhanush, Poshan Abhiyan and numerous other institutional measures. I hope that the medical education fraternity will dedicate themselves selflessly towards realizing a New India which ensures holistic healthcare for all.

I wish all the success for the award ceremony at Bengaluru. May the achievements of the award winners motivate all the stakeholders for pursuing greater excellence in the medical education.

(Narendra Modi)

Message

I am happy to know that, in keeping with their past practice and tradition, the Association of National Board of Accredited Institutions (ANBAI) are organising an event as 'Teacher's Day' in Bengaluru on 22.9.2018, wherein it is proposed to felicitate Medical Teachers who have enriched medical education through their innovative approach to teaching and research and honing the medical skill of the future generation of medical teachers and professionals. In the same event, ANBAI propose to felicitate medical institutes in the Country, which have excelled in imparting quality medical education to the students.

The Central Government is committed to providing affordable quality healthcare service to all, particularly the needy patients in all parts of the Country, even in the inaccessible and difficult to reach areas.

Recognition of the services rendered by the medical teaching professionals and medical institutes is a way to express our appreciation, respect and gratitude to them. I am happy that ANBAI is carrying forward this tradition year after year.

While congratulating the award winning medical teachers and medical institutes, I wish for success of the 'Teachers Day' Celebrations, 2018.

It is pleasing to learn that National Board of Examinations, together with Association of National Board Accredited Institutions is organizing an award presentation ceremony to honour eminent medical teachers and professional institutions.

The endeavours like these, I am sure, will strengthen the medical fraternity and in turn raise medical standards in the country to new heights. It is also very symbolic that the awards are being presented on celebration of Teacher's Day.

I wish the function every success and would like to extend my warm greetings to awardees.

“Teachers, I believe, are the most responsible and important members of the society because their professional efforts affect the fate of earth.”

- Helen Caldicott

Especially in the Medical profession teachers do play a very important role in shaping future doctors as medicine, which is both an art and a science needs to be taught and learnt with diligence.

I am happy to note that the Association of National Board Accredited Institutions is honouring distinguished teachers who have excelled themselves in contributing immensely towards creating specialists in our country, at the Teachers Day Awards Ceremony being held at Bangalore on Saturday the 22nd of September 2018 at the J.N. Tata Auditorium, National Science Seminar Complex, Indian Institute of Science (IISc).

It is worth appreciation that institutions which have strived to contribute towards Post Graduate Medical Education in our country are being honoured. I wish the awardees all success in their endeavours and sincerely hope that quality specialists would be available to the people of our country at all levels.

MESSAGE

It gives me immense pleasure and satisfaction to note that the National Board of Examination would be conferring National honour on eminent medical teachers, institutions and hospitals for furthering the cause of quality of medical education and excellence of health care in the country. It is indeed a great service of recognizing the creative contributions of the committed teachers and the dedicated hospitals by the National Board which indeed would act as a strong motivation in itself.

It is equally heartening to note that to commemorate the said occasion, a Souvenir is being released. This will give a sense of permanence to the laudable pursuit.

I wish the organization an all round success for the proposed ceremony.

Message

I am extremely pleased to know that the Association of National Board Accredited Institutions (ANBAI) is hosting an award night in Bangalore on September 22, 2018 to felicitate some of the most illustrious members of the medical faculty who have displayed outstanding commitment to the cause of postgraduate teaching and training programme in the country.

Since the time it was born, ANBAI and the National Board of Examinations (NBE) have been worthy partners with a common goal and mission. We at the NBE seek to enrich the country's human health resource in diverse medical disciplines through a robust, innovative, low-cost postgraduate teaching and training programme. The focus is on optimization of the existing well-founded healthcare facilities that offer vast clinical experience and have highly skilful clinicians who can stand up well as teachers. It is to accomplish this mission that the NBE accredits medical institutions both in the public and private segment.

This innovative approach rings in a number of benefits. It maximizes the utilization of existing hospital facilities, builds an academic milieu within these institutions, inspires the clinician-teachers to update their knowledge, and most significantly, improves the standards of patient care through 24 × 7 presence of young residents who stand committed to learn and perform, and possess the energy of youth. In essence, it is a win-win formula for all stakeholders.

The primary endeavour of the NBE is to create as many new opportunities as possible for the young medical graduates who wish to take wings and fly. Led by this affirmative "ahead of the times" approach, the NBE has been progressively increasing its total number of postgraduate and postdoctoral seats. Beginning with a mere 146 seats in 1982, the NBE today offers annually a total of 7,207 postgraduate seats. We wish to take this pious mission still further, and anticipate that ANBAI would contribute with all its might to this holy yajna.

I wish the office bearers of ANBAI, its constituent members and all other stakeholders a wonderfully successful award night, which would inspire the members of faculty to greater academic heights.

With best wishes,

Abhijat C Sheth

MESSAGE

It's a great pleasure and privilege to greet all ANBAI Members & congratulate Awardees of ANBAI Teachers Award.2018.

NBE accredited institutions have played an important role in the creation of the much needed health human resources in the country. Each of the institutions whether owned by private enterprises or non-profit entities have contributed immensely by allowing access to other physical infrastructure and clinical material for teaching.

NBE shall continue to nurture various Post graduate and Post doctoral programmes with emphasis on quality and innovation. NBE looks forward to integrate the benchmarks of quality in clinical care services and accreditation criteria for recognition of institutions so as to ensure quality, delivery of services as a component of training Post graduate doctors and specialists in their formative years. This shall go a long way in improving patient safety and creation of momentum of quality medical services as needed in the country.

The partnership between NBE and accredited institutions (members of ANBAI) is unique and distinctive one. This is one of the successful example of partnership between public and private sector, where NBE is playing the role of public sector in creating the institutional framework while the institutions with their robust faculty, infrastructure and willingness to provide training and mentorship join hands as part of the accreditation agreement to create the framework for DNB /FNB programme.

NBE, ANBAI and accredited hospitals have to challenge themselves and raise their output in the interest of the society and the country. We have to come out with newer courses and innovative ideas to reduce the gap between the doctors available and doctors required and I strongly believe that with this kind of network of hospitals and alongwith ANBAI it is achievable.

Message from Dr. Devi Shetty

Patron , ANBAI

My Dear colleague

For the last six decades, Dr Sarvepalli Radhakrishnan's birthday has been celebrated as Teacher's day all over India. This solemn day was chosen as the teacher's day with a view to honour Dr Sarvepalli Radhakrishnan who was a philosopher, scholar and above all an exemplary teacher. Dr Radhakrishnan has dedicated his time to educational purposes which shaped up the youth of this country. Dr Radhakrishnan was the first vice-president and second President of India.

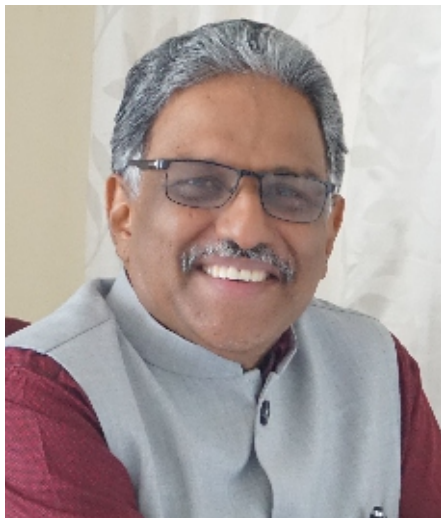

It is heartening to note that the National board of examinations and the Association of National board accredited institutions have chosen this day to give away the awards to the teachers who have excelled in imparting education to upcoming medical professionals in the country.

This awards are meant to recognise the contributions of institutions as well as the individual faculty members in their endeavour to attain excellence in imparting training.

I congratulate all the awardees for their selfless and untiring contribution to medical education education . This will set a new benchmark for the institutions and others to emulate.

with warm Regards,

Dr. Devi Shetty
Founder & Chairman Narayana Health

Message from ANBAI President Dr. Alexander Thomas

It gives me a sense of great pride and honour to extend a warm welcome to all of you to the ANBAI Teachers Day Awards Programme 2018, also I take this opportunity to express my appreciation and congratulations to all the awardees.

Dr. Sudarshan Ballal as the Organising Chairman, Dr. Muralidhar Kanchi as the Organising Secretary, Dr. Venkatesh Krishnamoorthy, President, ANBAI, Karnataka Chapter and Dr. Srinath have left no stone unturned in their endeavour to ensure that Teachers Day Awards Programme 2018 would be one of its kind event and worthy of being cherished for a long time to come.

One of the main objectives of ANBAI is to work hand in hand with NBE to improve upon the quality of PG Medical education in our country. Over the last year we have worked together in many areas. A big thank you to NBE especially for the valuable support and guidance rendered at all levels in organising this event today.

Teachers play a crucial role in shaping the future of the students, more so in a highly-specialized and skilled field such as medicine. Therefore there is always a dire need for dedicated, trained faculty who would be role models and contribute to the quality of students leaving colleges of the healthcare sector, thus improving upon the delivery and excellence of care for all citizens.

On behalf of all of us from ANBAI we acknowledge with gratitude the yeomen services rendered by the Medical Teachers and institutions towards the cause of Post Graduate Medical education in our country.

Dr. Alexander Thomas
President, ANBAI

Message from ANBAI National Secretary Dr. HS Chhabra

“Gurur Brahma, Gurur Vishnu, Grurur Devo Maheshwarai.....”

Guru – a Teacher, is one of the most respected figures all over the world. He is the architect of the future of our society, nation and the world. This role becomes all the more important when the teacher is building the future healers of the society. Understanding the importance of this role, ANBAI is pleased to organize the 2nd Teachers Day awards to felicitate some of the best teachers and the institutions who have been training the future healers for our society. Not that they need any recognition but its only a form of applaud for their marvelous work. On behalf of the whole ANBAI team, we extend a warm welcome to all of you.

The Organising Committee led by Dr. Sudarshan Ballal, Dr. Muralidhar Kanchi, Dr. Srinath Kumar T S & Dr. Venkatesh Krishnamoorthy have left no stones unturned to make it a very successful event. We should hence not only participate but also motivate our other colleagues to do so.

Looking forward to meeting you in Bangalore.

Dr. HS Chhabra
National Secretary, ANBAI

Message from Organising Chairman Dr. H Sudarshan Ballal

The organizing committee and I have great pleasure in inviting you to The ANBAI (Association of National Board Accredited Institutions) Teachers Day Awards Ceremony to be held on the 22nd of September, 2018 in the beautiful garden and IT city of Bangalore.

One of the greatest boons to postgraduate Medical Education in our country has been the introduction of Diplomate in National Board (DNB) courses which have helped a large number of doctors to get quality postgraduate education in the Non-Medical College stream. This has been possible because of the proactive approach by NBE and ANBAI hospitals.

We are very glad that the ANBAI is hosting this event to honour the teachers of DNB but for whom these programs would not have been successful. In addition to the awards ceremony we will also have an interesting academic session relevant to the current context.

Please do join us in Bangalore to celebrate this event together and make it a grand success.

Once again on behalf of the organizing committee, I extend a warm invitation to all of you.

Warm Regards,

Dr H Sudarshan Ballal
Organising Chairman,
ANBAI Teachers Day award 2018

Subject: Equivalence of DNB degree with MD / MS in the NMC Bill, 2017- reg.

Sir,

I am directed to refer to your letter dated 29.03.2018 on the subject cited above and to say that the clause with regard to equivalence of DNB with other PG / SS qualifications under the National Medical Commission Bill, 2017 as introduced in the Lok Sabha has been amended after considering the recommendations of the Department - related Parliamentary Standing Committee on Health & Family Welfare made in its 109th Report. In terms of the said Bill, the DNB degree shall be equivalent to other PG / SS qualifications in all respects including for the purpose of teaching.

2. The amended clause of the NMC Bill, 2017 prescribes that the DNB qualifications when granted in a medical institution with attached hospital or in hospital with at least 500 beds, shall be equivalent in all respect to the corresponding PG/SS qualification and in all other cases, senior residency in a medical college for an additional period of one year shall be required for such qualification to be equivalent.

Yours faithfully,

(Amit Biswas)

ANBAI Report

2017 - 2018

Dr. HS Chhabra

National Secretary, ANBAI

The Association for National Board-Accredited Institutions (ANBAI) is an apex organization of leading hospitals and medical institutions in India that are accredited by the National Board of Examinations (NBE), which administers the prestigious Diplomate National Board (DNB) and Fellow National Board (FNB) Programmes. Currently, the NBE conducts specialty and super-specialty training programs in about 72 disciplines in approximately 524 accredited institutions spread across the country.

NBE and ANBAI have initiated many projects for the betterment of DNB faculty and students. In the last seven years, ANBAI has initiated and supported many initiatives to improve the landscape of the national health sector. It has also liaised with government officials and ministers about the Medical Council of India recommendations regarding teachers eligibility qualification and the status of DNB qualification.

ANBAI has worked very closely with NBE in various areas. We are thankful to NBE for increasing the accreditation cycle to 5 years, involving more NBE institute teachers as examiners and inspectors and for initiating the externship, awarding of adjunct professor titles and formation of speciality boards. Criteria for hospital accreditation and other innovative ideas are being reviewed and discussed at NBE with inputs from ANBAI to ensure adequate number of quality professionals. ANBAI is also partnering with NBE through member hospitals to help in the online NEET process.

As an ongoing effort for seeking equivalence of DNB degrees with MD, after several meetings with PMO and Ministry of Health and Family Welfare ANBAI received a letter from the Under Secretary, Ministry of Health and Family Welfare dated 21st August 2017 that the PMO has instructed the Ministry to request MCI to provide the ministry with amendment proposal in TEQ regulations, deleting the 3 years junior residency requirement and to

specifically mention DNB along with MD/MS in academic qualifications for various faculty posts. Further meetings with PMO and Ministry is being planned.

ANBAI governing council members had several meetings with Mr Nadda, Minister of Health and Family Welfare and with the Joint Parliamentary committee to discuss the constitution and working of NMC. Mr Nadda has promised full support for equivalency of DNB with MD/MS degrees.

ANBAI has also been part of MOHFW & NITI Aayog committees to recommend ways and means to improve PG training in the country and is also exploring the possibility of starting a course in professional ethics along with AHPI & NLSIU.

The NBE faculty have been trained in healthcare communication and quality in health, the two crucial areas which do not have a place in the present medical curriculum. ANBAI is on the NBE-UNESCO Steering Committee on Teaching of Bioethics in PG Medical Education and on the Uniform Learning Resources Committee of the NBE.

Realising the importance of quality scientific resources (journals/ books etc.) in higher education in healthcare, ANBAI is trying to explore and facilitate a system, which will enable the end users and their institutions access to quality and standard content at a substantially economic price. ANBAI is collaborating with over 103 DNB Institutions and negotiating with 8 leading publishers for E-Journals to try to get significant discounts.

Another initiative under uniform learning resource is to have 'Webinars'. An extensive plan has been forwarded to NBE by ANBAI to start work on holding webinars initially in Basic Sciences to be followed in clinical fields also.

ANBAI had organised Teachers day celebration on 5th September 2017 at NBE Auditorium, New Delhi. On this occasion, awards were given to several

eminent teachers and Institutions. This year again it shall be held on 22nd September 2018 at Indian Institute of Science, Bengaluru along with the Annual General body meeting. The jury for selection of awards was chaired by former Chief Justice of Jharkhand and Himachal Pradesh, Justice V K Gupta and members of the jury were Dr Rashmikant Dave, Dr H S Chhabra, Dr Bhabatosh Biswas, Major General (Dr.) Madhuri Kanitkar and Dr Alka Ganesh. NBE has been supporting this event at all levels.

Another initiative under the leadership of the President was the consolidation of the State Chapter Governing Councils of ANBAI. Several state chapters of the Association held academic activities so that ANBAI could continue to work further realise the objective of serving the society. ANBAI has started publishing its Newsletter.

The Karnataka Chapter of ANBAI led by Dr. Venkatesh Krishnamoorthy has opened a web-page for the state and is organising this year's ANBAI Teachers Day Awards 2018

On 11th Nov 2017 at AGM of ANBAI at Ganga Hospital, Coimbatore, DNB Alumni and Teachers committee was formed under the aegis of ANBAI to provide a unified voice of DNB graduates across the nation. Currently, 350 members have registered for Alumni membership from all over India. A direct payment portal has been activated at ANBAI website and at ANBAI media partner, Medical Dialogues, website.

ANBAI Co-partnered with ISCoS for SCI Day - The International Spinal Cord Injuries Day. ANBAI celebrated on 3rd September 2018 the Spinal Cord Injury day at Rajpath in New Delhi. It was attended by a huge number of wheelchair participants and the occasion was graced by Minister of Science & Technology, Dr Harsh Vardhan.

Convocation of NBE is scheduled to be held at Vigyan Bhavan, New Delhi on 21st September 2018. ANBAI have extended full support to NBE to organise this massive function where over 10000 students have qualified for the degree are likely to participate.

The plan of action for the coming year include focus on Membership drive especially for alumni, strengthen academics at State Level, expand Uniform Learning Resource, liaisoning with NBE, liaisoning with Government for parity of NBE & MCI courses and to take postgraduate medical education to international standards. ANBAI will continue to facilitate redressal of problems of member hospitals with NBE.

The partnership between NBE and ANBAI today is exemplary and characterized by collaboration and strength in teamwork for the benefit of the health sector in our country.

Uniform Knowledge Resources

Dr.Muralidharan. M.

MB., MRCS,FRCS(Glas),FMAS

National Coordinator- Uniform Knowledge Resources (ANBAI)

Director Medical Education - Southern Region

It has been a busy year 2018 for NBE and ANBAI with regards to rekindling the NBE/ ANBAI uniform knowledge resources for NBE Accredited institutions. This onerous task was bestowed on the team headed by myself. The team comprised of ANBAI President Dr. Alexander Thomas, General Secretary DR. H.S. Chhabra and the Joint Secretary Dr. Sunil Sharma. This team has tirelessly worked nearly one year on behalf of all the NBE accredited institutions.

The aim of the consortia is to have a Uniform Knowledge resources across all NBE accredited institutes at an affordable cost.

To start with we collated the list of accredited institutions as per the seat matrix to find out the number of each departments across India. We did a pilot study to identify the needs of the NBE accredited institutes based on Large, Medium and Small hospitals. Based on the study a letter was sent to all the 520 institutes asking for the Letter of Intent (LOI). In Phase one 103 institutes gave their LOI or concurrence for this consortia.

We then discussed with NBE with regards to recommended books and journals as per the NBE curriculum. We were able to identify 10 major publishing houses for supply of these e-journals. The list of publishers who were included are as below:

1. Wiley
2. Springer
3. Cambridge Press University
4. Oxford University Press
5. Taylor and Francis
6. Balani Infotech
7. BMJ
8. Karger
9. Elsevier
10. Wolters Kluwer India

At this juncture we would like to place on record the zeal with which the incumbent president of NBE Dr. Abijath Seth and the Executive Director Dr. Rashmikant Dave encouraged us to drive this innovative consortia.

From this point we had multiple meetings with the publishers at New Delhi and Chennai to iron out various issues. Mr. Deepak Singh representing Wiley India Pvt Ltd., was proactive in getting all the publishers to the discussion table. Though most of the publishers were very open to our needs in these discussions, we have had problems with a couple of them. We are still in process of discussion to get them on board. At every stage the participating institutes were kept in the loop and have been briefed about the developments and financial implications.

We are happy to share that a new era will dawn for all the NBE accredited institutes on the 22nd September 2018, when this new consortia will be officially launched in the NBE/ ANBAI teachers day function at IISc Bangalore. We truly hope that this will help all the accredited institutions in achieving uniform knowledge resources at an affordable cost so as to enable them to achieve a successful programme.

DNB ALUMNI Committee Report

Dr A. Lingaiah

National DNB Alumni Co-ordinator, ANBAI

A large number of doctors, around 50,000 who are DNB qualified in Broad Specialties and Super Specialties are serving throughout our country and abroad, for the wellness and better health of mankind. In view of many issues being faced by DNB doctors and since there is no unified representation, the thought of forming a DNB ALUMNI and TEACHERS committee has crept up.

On 11th Nov 2017 at AGM of ANBAI at Ganga Hospital, Coimbatore, DNB Alumni and Teachers committee was formed under the aegis of ANBAI to provide an unified voice for DNB pass outs across length and breadth of the nation. The primary objectives of the committee is working for the cause of DNB equivalence at par with MD and to solve other issues faced by the DNB Alumni.

Dr A. Lingaiah and Mr Govind Hari were nominated and designated as coordinators and that they will liaise with the Executive Committee with Central ANBAI for all Alumni activities. Three regional zones have been formed viz :-

(1) NORTH ZONE for the states of Jammu & Kashmir, Haryana, Uttarakhand, Uttar Pradesh, Punjab, Delhi, Himachal Pradesh, Chandigarh & Madhya Pradesh.

(2) CENTRAL ZONE for the states of Andhra Pradesh, Telangana, Gujarat, West Bengal, Assam, Meghalaya, Manipur, Tripura, Mizoram, Nagaland, Bihar, Jharkhand, Chhattisgarh and Odisha.

(3) SOUTH ZONE for the states of Maharashtra, Goa, Kerala, Tamilnadu and Karnataka.

The major issue related to DNB Alumni is to get equivalence of DNB degree with MD / MS / DM / Mch. In this regard ANBAI and NBE were able to get equivalence with MD/MS/DM/Mch degrees and DNB degree with certain criteria's in 2012. However, present

MCI has once again changed its stance regarding NBE degrees by amending "Minimum Qualifications

for Teachers in Medical Institutions Regulations, 1998 Amended up to 8th June, 2017)" where NBE institution passed out candidates need to put in extra years for being appointed as Asst. Professor whereas MCI institution passed out candidates can be appointed without the said requirement and hence it is discrimination.

Other Issues related to DNB Alumni are:-

- It is being felt that DNB degree nomenclature be changed to Master's degree as lay people are equating DNB with "Diploma" instead of "Diplomate."
- MD / DM / MS / Mch degree conferred postgraduates can simultaneously add DNB degree by just passing the Final theory and practical NBE exam. The reverse is not true for DNB degree conferred postgraduates. Either NBE should stop MCI postgraduates from appearing for DNB final exams or pursue the case with MOHFW to allow DNB postgraduates to add MCI nomenclature degrees as a feather in the cap.
- For Fresh/Renewal of a particular DNB/FNB speciality accreditation, it is observed that MCI faculty are being sent as inspectors. Hence, it is requested to send as far as possible DNB faculty as inspectors.
- To the extent possible DNB qualified candidates must be appointed as examiners not only for DNB Final practical examinations but also towards evaluation of final exam theory answer sheets.
- DNB teachers are not designated with appropriate academic ranks as Professor, Associate Professor, Asst. Professor, etc. compared to their counterparts in MCI affiliated institutions. Till date, DNB teachers are only designated as Senior Residents, Junior and Senior Consultants which seems unfair.

- Candidates possessing either DNB Broad Speciality or DNB Super Speciality degree must be utilized as DNB faculty as PG teachers even if they possess DM/Mch degree as one of their academic qualifications.
- DNB Final Practical Exams to be conducted in NBE accredited institutes only
- Time lapse between award of degree & result declaration by NBE to passed out candidates is very long.

It is decided to charge a fee of Rs 500 for annual membership and Rs 2000 for life membership. DNB Alumni committee membership form is now online & can be accessed on Anbai.org website wherein online payment is accepted. So far, 600 doctors have become the members of the Alumni Committee.

An All India DNB Alumni committee Meeting was conducted on May 26, 2018 at Yashoda Hospital, Secunderabad. The event witnessed the participation of alumni from various parts of the

country. Signature release of DNB National Alumni Life Membership card was also done. A Telegram app of All India DNB Alumni committee had been created to engage all DNB alumni in order to bypass the limitations of whatsapp group, especially related to enrolling more number of members. Medical Dialogue has been selected as our media partner on a regular basis for all DNB Alumni requirements and membership drive.

The future plans of the Alumni committee are: apart from tackling of the issues faced by the DNB Alumni, to develop a new strategy emphasizing the recent DNB passed doctors and the students who are going to pass out to become alumni members and to promote academics at State and Central level to provide uniform learning resources by liaising with NBE. ANBAI to act as the nodal body to promote placements of DNB qualified candidates. DNB degree holders to be considered on par with MCI degree holders for State and Central Government jobs.

Report on Academics

Dr. Nagendra Swamy

National Academic Co-ordinator

It is heartening to note that a few of the ANBAI chapters especially in Maharashtra, Andhra Pradesh and Telengana have continued academic activity through their academic co-ordinators. The team has submitted a detailed proposal to the NBE regarding web based teaching programme in basic sciences for post graduates of both broad based as well as speciality subjects.

The subjects included are Anatomy, Physiology, Biochemistry, Pharmacology & Pathology and the faculty would be drawn from NBE accredited institutions, from Medical colleges and also from other reputed teaching sites. Also a simple feedback system like a rating scale from 1 to 10 has been suggested to review the content based on the

feedback received and in addition a question and answer session at the end of each lecture could be used to evaluate the student.

The central team is also endeavouring to get approval for centralized library or journals in order to enable virtual sharing. This will in essence result in monetary savings, avoid duplication and ultimately more books will be available to the students for reference.

This is an important activity of ANBAI, and it is requested that all state chapters coordinate with the National academic coordinator to make this more effective and useful.

30 YEARS AGO, SOUTH TAMIL NADU STOPPED WAITING FOR THE BEST MEDICAL FACILITIES.

Dr. S Gurushankar
Chairman

For over 30 years, Meenakshi Mission Hospital, Madurai has been at the forefront of healthcare in South Tamil Nadu. Throughout our eventful journey, we have striven to improve access to path breaking innovations and the best global current practices. Our commitment to provide the best service has helped us ensure the well being of thousands of people from across the state, and in the process, we have grown into a 1000 bed hospital with 45 departments. So when the people of Madurai and Tamil Nadu look for the best possible medical care, they don't have to look far.

TOMORROW'S HEALTHCARE TODAY

 **1000 BEDS**

 **45 KEY DEPARTMENTS**

 **400 FULL-TIME DOCTORS**

 **9 LAKH HAPPY SMILES**

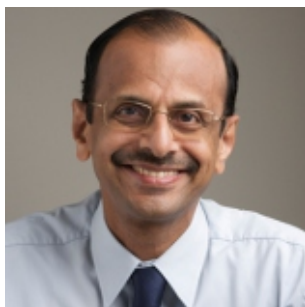

**Meenakshi Mission® Hospital

- Fellow of Royal College of Physicians of Glasgow, Fellow of Indian College of Physicians & Indian Association of Clinical Medicine.
- Examiner, Royal College of Physicians for FRCS & Khesar Gyalpo University, Bhutan.
- Over 110 publications in international and national journals, 2 text books, 16 books for lay people.
- Area of interest: Rheumatology and HIV medicine.
- Primary investigator for many clinical phase II/III drug trails on Amyloidosis, Osteoporosis and Rheumatoid Arthritis.

Life Time Achievement Award

Dr. Prathap C Reddy Founder, Chairman Apollo Hospitals Group

Dr. Prathap Chandra Reddy, founder Chairman of Apollo hospitals is a compassionate humanitarian and a visionary, who dedicated his life to the cause of bringing world-class health care within the economic and geographic reach of millions.

The advent of Apollo hospitals in 1983 steered a revolution and marked the birth of quality, affordable world class private health care in India.

Over the years Dr. Reddy carried the torch of healthcare to distant corners of India, harnessing technology to take healthcare to the masses.

The pioneering success of Telemedicine and the innovative insurance scheme in Aragonda (his birthplace) incidentally the world's first V-Sat enabled remote village in Andhra Pradesh, validated the concept of "Healthcare for all"

He also conceived the ground breaking concept of Apollo reach hospitals model, which takes quality health care to semi urban and rural areas.

The innovative insurance project of Rs 1 per day that Dr. Reddy introduced decades ago in his native village has been adopted in multiple forms across the country and has enabled the creation of a platform for the Government of India's Universal health insurance programme for the below poverty line population.

Being a firm believer and a staunch advocate of preventive healthcare, Dr. Prathap C Reddy propagated this concept through annual health check-ups and over 15 million health check-ups have been performed by the group.

Recognising the need to take the battle against disease well beyond hospitals, Dr. Reddy championed the Billions Hearts Beating Foundation, an endeavour that

deploys innovative mediums to encourage Indians to stay heart healthy.

Dr. Reddy being a philanthropist introduced many social initiatives that helped transcend barriers and one such is the save a child's heart, that is addressing the wide spread issue of congenital heart disease in India.

Dr. Prathap C Reddy was conferred the Padma Vibhushan, the second highest civilian award by the Government of India, acknowledging his untiring pursuit towards excellence in health care.

On Saturday the 22nd of September 2018, The

ANBAI and the NBE feel honoured in conferring the Lifetime Achievement Award on Dr Prathap Chandra Reddy in recognition of his pioneering efforts of bringing world class health care to India within the reach of every Indian and laying the foundation of quality state of the art private healthcare in our country

Clinicians as Scientists

Dr. Ravi Nayar

Dean, HCG

In this fast changing world, the role of the clinician has changed in his own eyes, the eyes of patients and society at large. Where once he had a demi god status, the profession is now alternately reviled as being capable of culpable homicide or treated as one to be humoured as a technophobe who needs to be guided to use whatever technology is being peddled at the moment, by whichever company has convinced the management.

It is time for us clinicians to reclaim our own space, determine for ourselves what we are, what we need, what we want to become, and let people know where we stand.

It is my considered opinion that we should realize that we are scientists, applied scientists at that, though applying a rapidly changing group of basic sciences, with an imprecise understanding, born out of an urgency to provide relief to patients.

We are not infallible, we are not all knowing, not only because we are human, but also because all is not known nor can it ever be. But the need to take decisions with imprecise understanding and need to learn from these decisions and their outcomes is paramount. Add to this is the effect of mind over matter and the advances in sciences and technology, the ever increasing democratization of medical knowledge grace a la "internet penetration", and the need to earn a livelihood, ours is a difficult profession to practise.

Hence we have no alternative but to approach the science of medicine, and its application to an individual patient as a scientist would. The hallmarks of a scientific approach is humility, methodicity, reiteration, belief in facts, honesty in data collection, verification of hypothesis by facts, scientific analysis and being guarded in interpretation. A dispassionate view of the paragraph above will ensure that we understand that clinical medicine is a scientific pursuit, has been, is and will always be.

We just have to realize it ourselves and let the world know.

The realization is the demystification of the clinical process and that is already underway, by the advent of evidence based medicine approaches, guideline protocols or regular audit of results.

But the importance of the necessity to let the world know has not yet been fully appreciated. For instance the legal system does not that not all complications are due to negligence. This has important implications for the unfettered practice of clinical medicine.

Thesis writing for DNB Students

Dr. Alben Sigamani

MD MSc (Clinical Trials)

Group Head - Narayana Health - Bangalore

I came across this interesting expansion for the word “THESIS” - True Happiness Ended Since It Started”. I felt that it resonates well with what most students pursuing their post-graduation or residency in any field feel about doing their thesis work.

Leon Festinger, an American social psychologist once wrote “A man with a conviction is a hard man to change. Tell him you disagree, and he turns away. Show him facts or figures and he questions your sources. Appeal to logic and he fails to see your point”.

Today we live in a world of advancing technology and an ultra-fast paced lifestyle. People communicate across continents and time zones with simple hand-held devices. Information travels faster than the speed of sound. Scientific discoveries are informed to the public and shared to all stake holders in real time. This makes us doctors also vulnerable to knowledge that is changing so fast. Research is all

about systematically going through this information and exploring its impact on our day to day practices. As per the Guidelines for Thesis Protocol writing issued by the National Board of Examinations; quote “The development or preparation of the Thesis Protocol by the candidate will help him in understanding the ongoing research activities in his area of interest. Further it helps in creating practical exposure to research and hence it bridges the connectivity between clinical practice and biomedical research. Such research exposure will be helpful in improving problem solving capacity, with ongoing research and implementing these findings in clinical practice”. Unquote.

My talk will cover the steps in building the components of a thesis protocol and explain the importance of why we need to perform a thesis using appropriate methods needed for any research study.

TELE-EDUCATION IN MEDICINE

Authors: Muralidhar. K, Sanjay Banakal & Devi Prasad Shetty

Narayana Institute of cardiac Sciences

NH Health City, Bangalore, Karnataka, India

Objectives:

E-health is the application of information and telecommunication technology for managing and delivering health care services. We have used the tele-medicine facility to conduct academic teaching / training sessions in a tertiary care cardiac hospital. The objective of this study was to examine the feasibility, advantages and disadvantages of this method of tele-learning sessions.

Methods:

Two base cardiac hospitals with facilities of tele-cardiology link up were established in June 2001. These base hospitals were connected to coronary care unit facilities at six rural area settings. Patients related information (ECG, chest X-ray, echocardiography & coronary angiogram) was transmitted

over telecommunication infrastructure and was supported by video-conferencing. Having

established the tele-medicine network, the same facility was used to conduct teaching programmes. The teaching / learning session were organized twice a week between the two teaching hospitals. The success of academic session were analyzed in terms of satisfaction of the participating candidates, infrastructural difficulties, if any and the over all outcome of the programme. A questionnaire was formatted and feedback from the participants was obtained. One thousand responses were analyzed and data were tabulated.

Results:

A total of 293 academic sessions were held during the study period of three years. Presentation time was 35 minutes in each session and made on a power point. Presentations were followed by discussion. All the participants expressed satisfaction over the teaching and overall attendance was 80%.

| Advantages of tele-education | Challenges of tele-education |
|--------------------------------|-----------------------------------------------------------------|
| Sharing of knowledge necessary | Commitment from participating institutions |
| Sharing of faculty | Multipoint equipment costly |
| Enthusiasm | Technical difficulties in connectivity |
| Satisfaction | Medical emergency: delay on starting |
| | Planning, scheduling must be precise |
| | Faculty and technical support essential |
| | Over all costs must be met with |
| | Different time zones if catering to students in other countries |

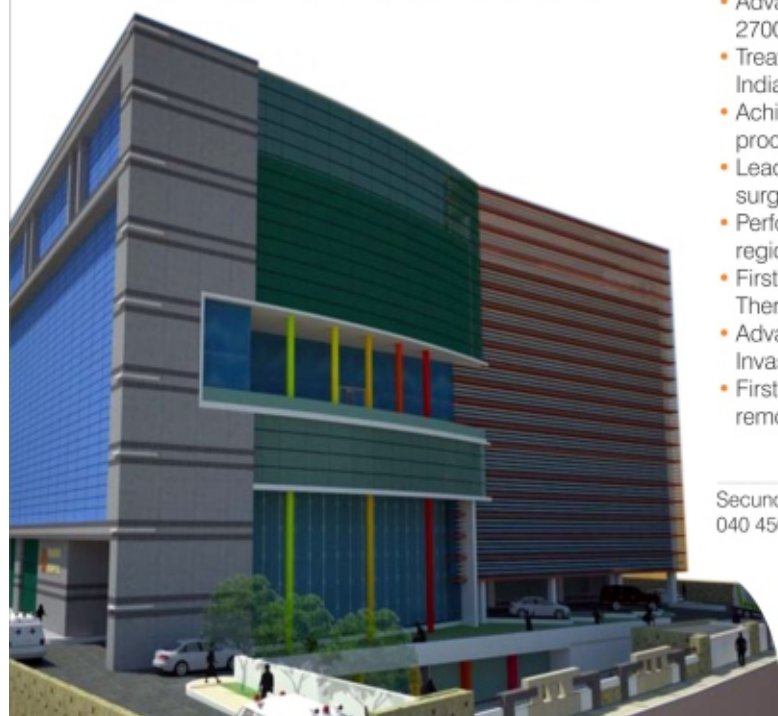

Conclusion:

We have found that telemedicine proved to be effective in establishing communication not only between the patient & the physician but also between the teacher and the taught. Several candidates were benefited by this technology. Candidates expressed satisfaction and were content with the teaching methods adapted.

Keywords: Telemedicine, teaching methodology

Trusted Family Healthcare Provider for over 30 Years

Yashoda Hospitals, a trusted name in healthcare has evolved as a Center of Excellence in Medicine. Some of its highlights are:

- Only hospital in the region to have performed a combined Heart & Lung Transplant
- First Inter-State Heart transplantation in the region
- First ever Haploidentical Bone Marrow Transplantation was successfully done in Telangana & Andhra Pradesh
- Advanced Liver Institute: Team with experience of over 2700 Liver Transplants
- Treated world's largest number of cancer patients in India using RapidArc Radiotherapy Technology
- Achieved a record of over 20,000 successful cardiac procedures per annum
- Leaders in Robotic Surgery: Most experienced Robotic surgeons in Telangana & Andhra Pradesh
- Performed the first Robotic Renal Transplantation in the region
- First among few to introduce Intra-arterial Thrombolytic Therapy for Acute Ischemic Stroke
- Advanced Ortho Care: Busiest Center for Minimally Invasive Surgeries and High Flexion Joint Replacements
- First in India to introduce 3T Intraoperative MRI for the removal of brain tumors

SAIFEE HOSPITAL

Saifee Hospital was inaugurated on June 4, 2005 by the Honourable Ex-Prime Minister of India, Dr. Manmohan Singh. It was the culmination of a noble desire by Late His Holiness Dr. Syedna Mohammad Burhanuddin (RA) to build a hospital that would cater to the essential healthcare needs of the common man and dedicate it to the memory of his revered father, His Holiness Dr. Syedna Taher Saifuddin (RA). The Hospital's core strength is Prevention is better than Cure, headed by

1. Dr Ahmed Khapra Honorary CEO
2. Dr V P de'Sa Director Medical Affairs Clinical Compliance & Governance
3. Mr Huzaifa Shehabi Chief Operating Officer/Senior Executive Director
4. Dr Iqbal Bagasrawala Associate Director Medical Affairs
5. Dr S J Bapai Associate Director PR & Government Affairs
6. Mr Mustafa Daginawala Chief of Finance Officer

APOLLO HOSPITALS

CELEBRATES 35 YEARS
OF CARING FOR YOUR HEALTH.

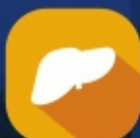

The first Apollo Hospital took birth in Chennai in 1983. But Chennai, you are more than just our birth city; it was you who was the first to honour us with your trust. Your conviction in us motivated us to keep introducing the global best in diagnostics and treatment protocols, to save millions of lives and over the years, led to our emergence as Asia's most trusted healthcare institution. Here we are today, looking back at our humble beginnings in Chennai. We rededicate ourselves to putting your health first, no matter what. Nandri Chennai!

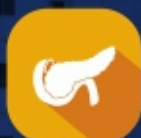

Bengaluru's most Trusted Quaternary Care Hospital for the most Complex Surgical Procedures

Our Services:

Liver Transplant

Pancreas Transplant

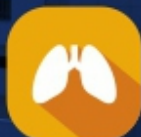

Kidney Transplant

Bone Marrow Transplant
